Grand 1016

Rust Remover

Grand 1016 is a special advance formulation which is highly active in rust removing and surface renovator that prepares metal surfaces for refinishing.

Area To Use :-

GRAND 1016 is used to renovate metal equipment, machinery, valves, pipes, cooling tower, tank, metal sheet etc. *GRAND 1016* can be used in marine automotive and food processing industries or anywhere, where the corroded surface must be refinished or the effects of corrosion damaged must be repair.

Direction To Use :-

Method of BRUSH-ON, or DIP TANK METHOD is recommended. For light coating of rust *GRAND 1016* can be diluted up to 1:3. Brush on rusty surface, rinse with water, before surface can be recoated with paint or other finishing.

For heavy rusted surfaces, use *GANNND 1016* as it is. Repeated brushings may be required for satisfying result.

Dip tank application requires a plastic container. *GRAND 1016* can be diluted with three parts of water. Dip all rusty metal into container containing *GRAND 1016* with a basket. Leave it for several minutes. Remove metal parts from container and rinse clean with water before painting or recoating can be applied.

Features & Benefits :-

DEEP PENETRATING ACTION – *GRAND 1016* penetrates rapidly to cut through grease and rust without pre-cleaning or degreasing. *GRAND 1016* removes rust and microscopically etches the metal surfaces for refinishing.

Characteristic :-

TYPE : PENETRATING RUST REMOVER
COLOUR : BROWN
pH : 1
FLAMMABILITY : NON-FLAMMABILITY
TOXICITY : ACIDIC, HARMFUL IF SWALLOWED
COMPOSITION : HYDROGEN CHLORIDE, BIODEGRADABLE, SURFACTANT AND SPECIAL INHIBITORS.
